

## Multi-Modal Biometric Capability

Identity Warrior performs multi-modal biometric collection on any Android device. Collects:

- Contact Fingerprints
- Face
- Palm
- Contactless Fingerprints
- Iris
- Voice

- Accepts any Integrated Biometrics (IB) Fingerprint/Palm and Iritech Iris Sensors
- Works with integrated hardware devices like IB Magnum, Javelin+ and Javelin XL

## Local Defense Watchlists and Sends Transactions to DoD ABIS

Operate in a network connected or disconnected state.

- Local Defense Watchlists for face, finger and iris. No limits on database sizes
- Off device matching in DoD ABIS via SOFEX, DEX, DoNISIS or NRTIO.
- **NO GATEWAYS, TRANSACTION MANAGERS or SERVER FEES**
- JITC Certified for DoD EBTS v4.1 and NATO STANAG 4715 Compliance.

## Face from Video and Long-Range

- Use device camera or pair with off-the-shelf camera to process faces from real time video/imagery and receive match/no match response against local Defense Watchlist

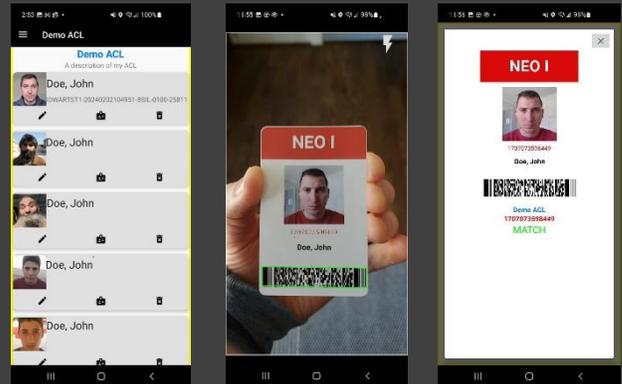

## Properly Scaled Developed/Undeveloped/Gel-Lifted Latent Print Capture Technology

## Peer-To-Peer Synchronized Access Control Lists

Create biometrically enabled Access Control Lists (ACLs) for multifactor authentication of individuals and accountability.

- Enroll subject's biometrics and generate badge to be printed or digitally shared.
- Synchronize across devices with or without a network connection.
- **OPERATE COMPLETELY AT THE EDGE NO GATEWAYS OR LAPTOPS REQUIRED**
- Multifactor authenticates subjects by their biometrics and badge scan.
- Check in and check out authenticated individuals for accountability and synchronization across devices.

## ATAK/WinTAK Integration

Communicates directly with TAK server to send spot reports whenever a biometric match is made. Geo location, face image and rap sheet provided.
